ENCAPTO
FOR HOTELS

One network, many uses

The ability to apply multiple time, download and speed restrictions on a single hotspot makes Encapto WiFi the perfect management system for the many demands of hotel WiFi systems.

With one stop management and monitoring from the Cloud Deck control panel and easy integration with loyalty programs and guest booking systems, Encapto WiFi is the only solution for the modern accommodation provider.
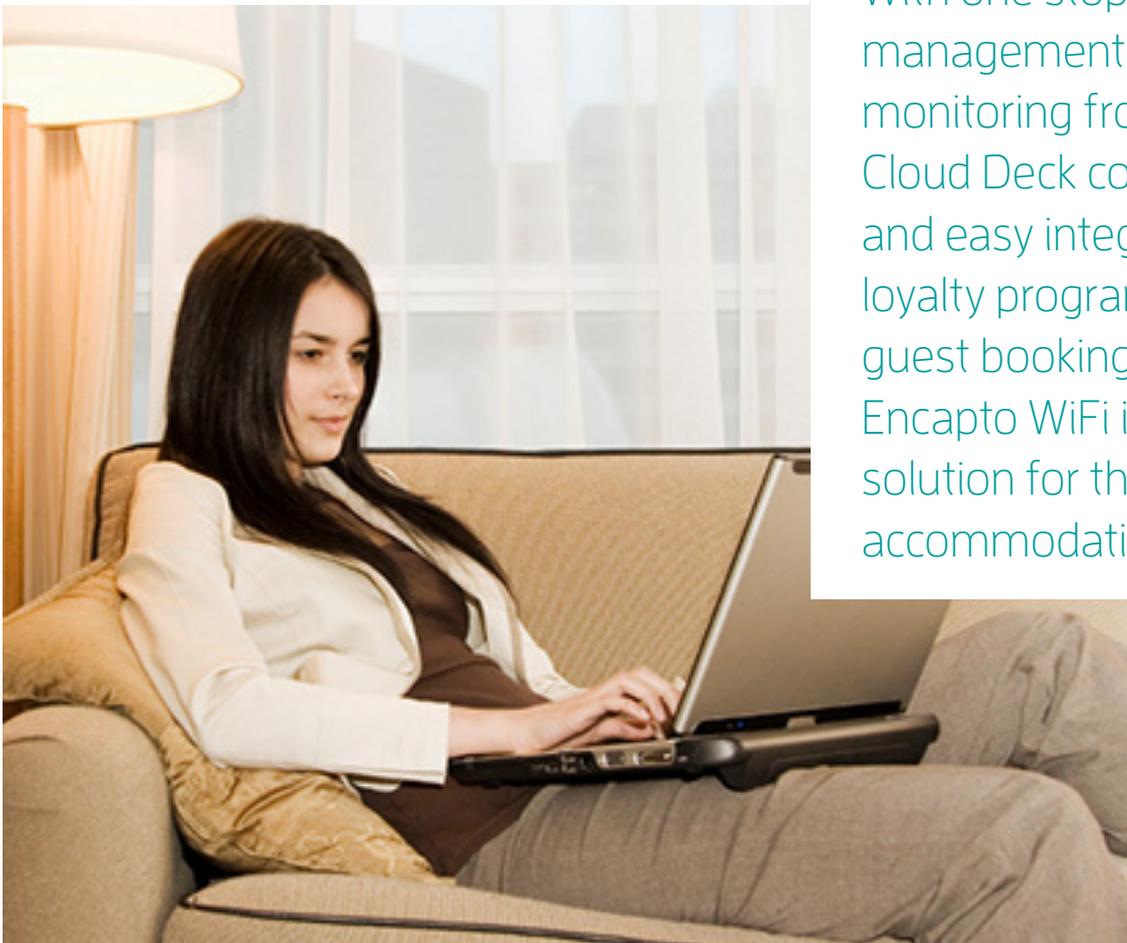

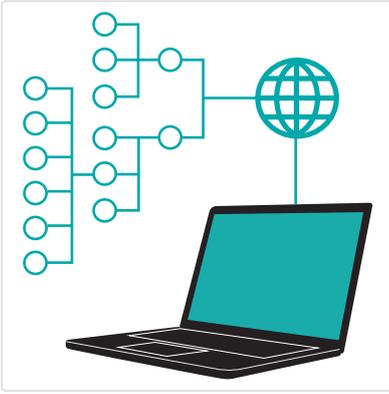

Simple hotspot management

Multiple hotspots setup or edited with a just a few clicks.

Encapto's intuitive network profile approach takes the headache out of configuring and managing multiple hotspots.

Use the Encapto Wizard to apply hotspot and network settings to a site and then save the settings as a profile to apply to other sites. Make changes to shared profiles to instantly update multiple sites with just a few clicks.

Scalability

Encapto's modular approach means expanding your network or adding new functionality is quick, easy and cost-effective.

Manage thousands of hotspots across many locations – sharing or copying settings, content, authentication methods and access controls. Encapto will cater for a handful of users at a single hotel or thousands across multiple sites.

Flexible licensing means you can pay for a number of concurrent users on a yearly or monthly basis and apply more capacity on specified days or weeks to cater for those big events.
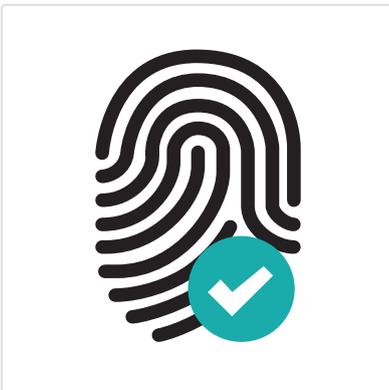

Multiple authentication methods

Generate unique or shared passwords, enable credit card access or use one of the Encapto connectors to authenticate via your loyalty program or hotel booking system. Get your clients and staff online seamlessly and according to their needs.

- Click and go
- Unique or shared passwords
- Paid access
- Social media logon
- SMS and email authentication
- Database authentication
- Data capture (survey or registration)
- Encrypted access
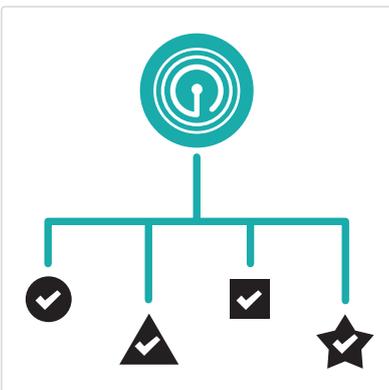

Vendor agnostic

The Encapto system can be applied to any WiFi network, existing or planned.

Put Encapto's trademark flexibility, robustness and elegance at your fingertips from your Cloud Deck control panel regardless of your choice of WiFi hardware. You can even deploy and run networks from different vendors all through the one interface.

And we also integrate a range of vendor specific services such as location analytics, to extract maximum value from WiFi networks.

Marketing campaigns

Create elegant WiFi captive portals and deliver targeted rich content from Encapto's Cloud Deck control panel.

And for that extra marketing edge, Encapto Campaign delivers targeted advertising to users on connection to a hotspot and during a hotspot session.

Localised content leverages the high-speed capabilities of 802.11ac wireless providing an immersive experience for connected users and eliminating reliance on costly and speed-constrained internet connections.

Carrier class user management

Built on carrier class standards AAA RADIUS, Encapto reliably serves over one million WiFi sessions a month to wireless networks of all sizes – cafés, stadiums, public transport, and large municipal networks.

Built on Amazon's AWS cloud, Encapto offers a 99.99% uptime guarantee.
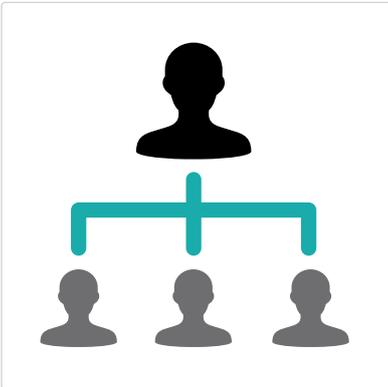

Nested user permissions

With so much functionality packed into a single platform, Encapto's granular user permissions put the right functionality in the right hands.

The marketing manager needs to update an ad in an Encapto Campaign while the IT manager needs to deploy a new SSID for hospitality staff. Encapto caters for them all with a fully customizable interface.
