

Wireless Connectivity for Security Networks

It all begins with great connectivity

As security video networks grow in size and complexity, their wireless backhauling solutions are increasingly challenged by highly congested spectrum and limited bandwidth.

Siklu introduces the future of wireless security video networks delivering interference-free Gigabit throughput even in the most crowded cities.

10x Spectrum

Providing interference free operation even in dense urban areas

4x Capacity

Delivering Gigabit throughput for your HD and 4K video

2x Reliability

Offering carrier grade and over 80 years field proven MTBF

1/3x Footprint

Presenting the industry's smallest undetectable street level radios

1/8x Latency

Enabling extended cascading without compromising streaming

Maximum Performance, Minimal Cost.

Unbeatable prices per megabit as well as minimal installation costs.

Siklu's products can be installed in less than 15 minutes by non-Telco professionals.

Street-Level

EtherHaul-600T - Palm sized radios that can be installed on poles, traffic lights and building sides.

Rooftop Aggregation

EtherHaul-1200 - Gigabit throughput for aggregation of multiple backhaul links.

How will you future-proof your wireless security network?

Siklu's radios are the most deployed millimeter wave systems in the world. We deliver Gigabit capacity with carrier grade performance even in the most challenging weather.
