Captive Portal

Easy Onboarding

Paid Onboarding

Fully Customisable

User Self-Authentication

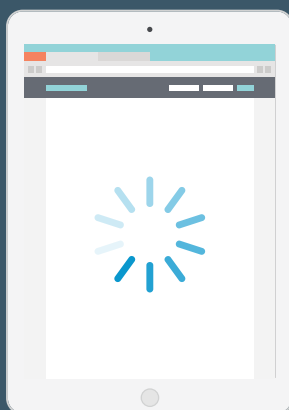

Credit Card Processing Engine

PMS Integration

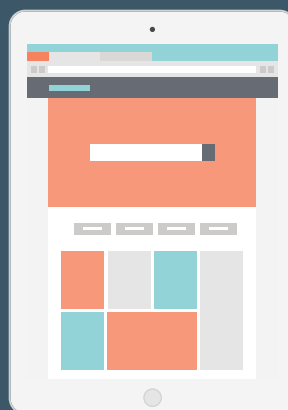

External Database Authentication

Bandwidth Management

Competitor (slow loading)

RG Nets (Burst*)

Per User Traffic Shaping

Rate Limiting

*Bandwidth Bursting

Quota Enforcement

Packet Prioritisation

Security

Firewall

Switch

Separate VLANs

Fully Integrated Threat Management System

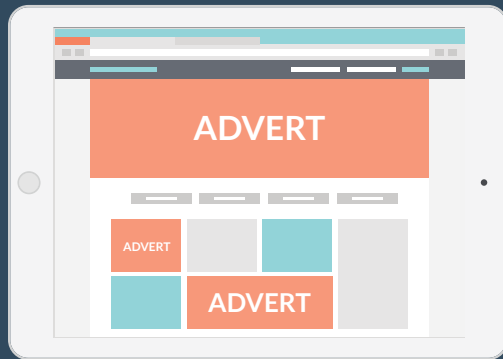

Stateful Firewall

Intrusion Detection

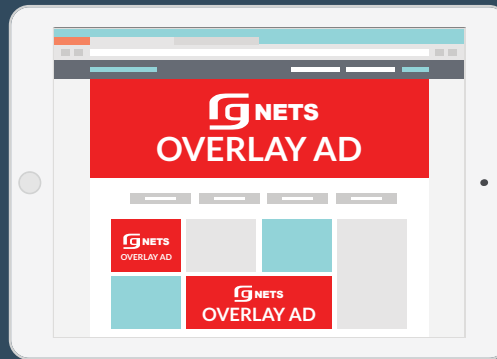

Deep Packet Inspection

Web Experience Manipulation

Web Page without RG Nets

Web Page with RG Nets

- Message Delivery
- Advertisement Injection
- Advertisement Overlay
- Frame Injection
(banners, popups, etc)
- Search Query Re-Write
- Policy Based Delivery of
Experience Manipulation

Automatic Dynamic VLAN

All devices attach to a single SSID

- Automatically assign VLANs by
device or account
- Zero operator intervention
provisioning
- Onboard headless devices
- Take your connection anywhere on
site
- Each device has it's own dedicated
or grouped connection
- Security breaches are eliminated

Core Networking Services

- DNS
- DHCP
- RADIUS
- Uplink Aggregation
- Load Balancing
- Carrier Diversity
- Automatic Failover

Reporting and Auditing

- Graphical Instrumentation and Auditing
- Monitor Every Aspect of System and Network Performance
- Real-Time Graphs
- Packet Capture
- Web Cache
- Store Surf Histories of Every User
- Resource Consumption Dashboards
- Consumption Comparisons and Utilisation Trend Tracking
