

SECURE AND RELIABLE WIRELESS BROADBAND SOLUTIONS

Leading global provider of wireless broadband solutions that connect the unconnected
People, Places and Things.

Dependable

Hardware and software with legendary reliability built in and backed up by Dynamic Spectrum Optimization that lets your network weave around heavy interference. Cambium Networks PTP series is the right choice when you need a network you can depend on.

Real World Performance

Industry-leading spectral efficiency means your network can make the most of the available spectrum in hostile wireless conditions, while renowned wireless performance and hitless adaptive modulation let you and your critical assets stay connected whatever happens.

Long Range

With proven efficacy over 245 km, Cambium Networks PTP series are the tools of choice for ultra long-range connectivity. Whether connecting a hospital, mobile command center, or your access network, distance is no longer a barrier.

CAMBIUM NETWORKS POINT TO POINT

Planning and Management

LINKPlanner software helps design links by modeling access network performance and availability before installation. cn Maestro™ Management software provides map-based visualization of the entire end-to-end network with diagnostic tools for configuration, provisioning, and alarm reporting.

Select your wireless broadband backhaul:

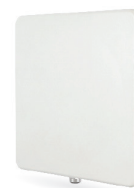

Licensed Band Solutions

PTP 820

PTP 700

PTP 450i

Configurations	Full outdoor, split-mount, all indoor	Full outdoor connectorized or connectorgrated	Full outdoor, integrated or connectorized
Frequency	6 – 38 GHz	4.4 to 5.9 GHz	3.3 to 3.9 GHz 4.9 to 5.9 GHz
Throughput	Up to 2 Gbps full duplex	450 Mbps	250+ Mbps

Sub-6 GHz Unlicensed Band Solutions

PTP 650

PTP 450

Configurations	Full outdoor, integrated or connectorized	Full outdoor, integrated or connectorized
Frequency	4.9 – 6.05 GHz	3.3-3.8 GHz 5.4-5.8 GHz
Throughput	450 Mbps	200+ Mbps
