

cnPilot™ Cloud-Managed Wi-Fi

Scalable end-to-end 802.11ac wave 2 and 802.11n Wi-Fi solutions.

cnPilot Indoor Wi-Fi

Affordable enterprise grade high density 802.11ac wave 2 indoor access points for schools, indoor public spaces, malls, hotels and resorts, coffee shops, multi-dwelling units, or just about any place indoors that needs reliable, high performance indoor WiFi.

cnPilot Outdoor Wi-Fi

Controller managed, Gigabit IP67 802.11ac outdoor access points for enterprise campuses, public WiFi, hospitality, educational institutions, industrial campuses or for just about any demanding outdoor WiFi deployments. E500/E501 APs can be backhauled over Gigabit Ethernet for fiber or copper networks or can mesh with other E-series AP's or can be paired with Cambiums backhaul to rapidly deploy outdoor WiFi.

cnMaestro

cnMaestro is the cnPilot controller and network management system. The cnMaestro suite of software offers inventory tracking, onboarding of devices, and ongoing daily operations and maintenance including software upgrade, configuration management, statistics monitoring as well as alarms.

cnMaestro is available in the cloud or as an on-premises (NOC) virtual software that can be run in a private data centre on a local server.
