

# 5\* UPS SYSTEMS

CertaUPS power protection systems are deployed across a plethora of hospitality facilities including; hotels, youth hostels, bed and breakfasts, restaurants, cafés, bars and travel agents.

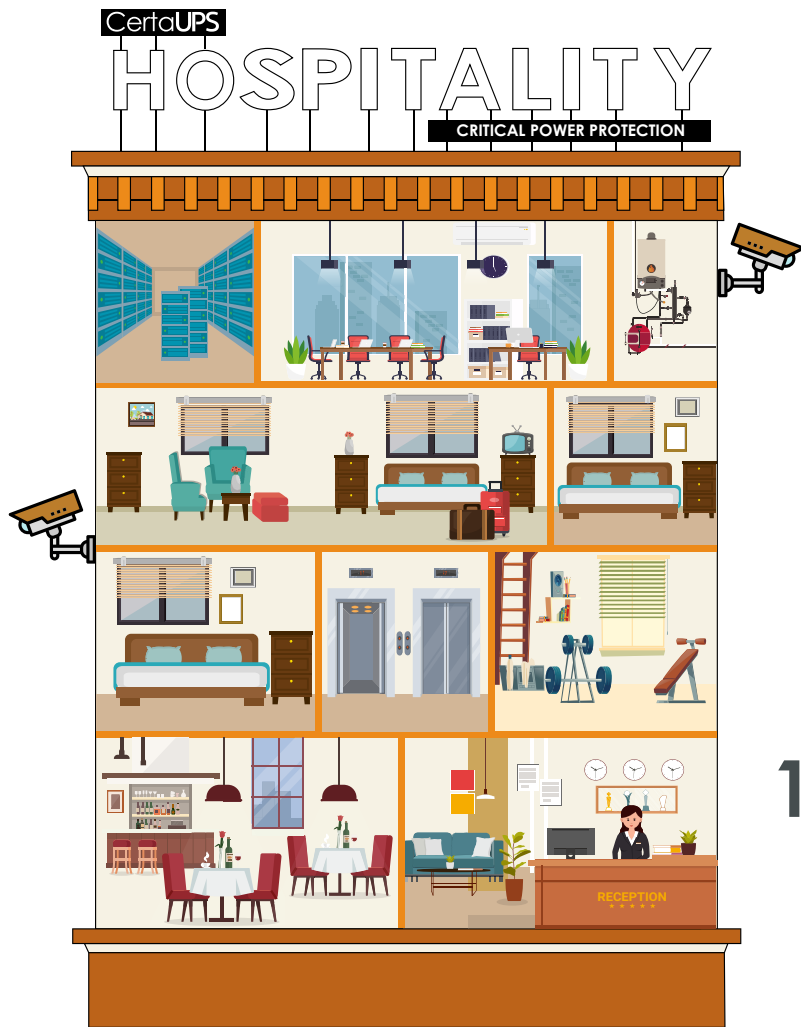

The critical power systems extend far beyond just protecting IT related loads to CCTV, access control, ePOS, emergency lighting, fire safety systems, evacuation lifts, telephony kitchen applications, air conditioning and many more.

Known worldwide for their cutting edge technology and superior component structure, CertaUPS backup power systems deliver on reliability, flexibility and affordability.

Available from 800VA, the single phase UPS range encompasses line interactive and online double conversion UPS systems in both rackmount or tower form.

**TOP 5**

Hotel facilities rank among the top five in terms of energy consumption.

Heating,  
Ventilation,  
Air conditioning
