

The RUCKUS advantage

With RUCKUS products and solutions, your organisation can easily deploy, manage and expand a converged IT/OT network.

What RUCKUS offers

Our products and solutions:

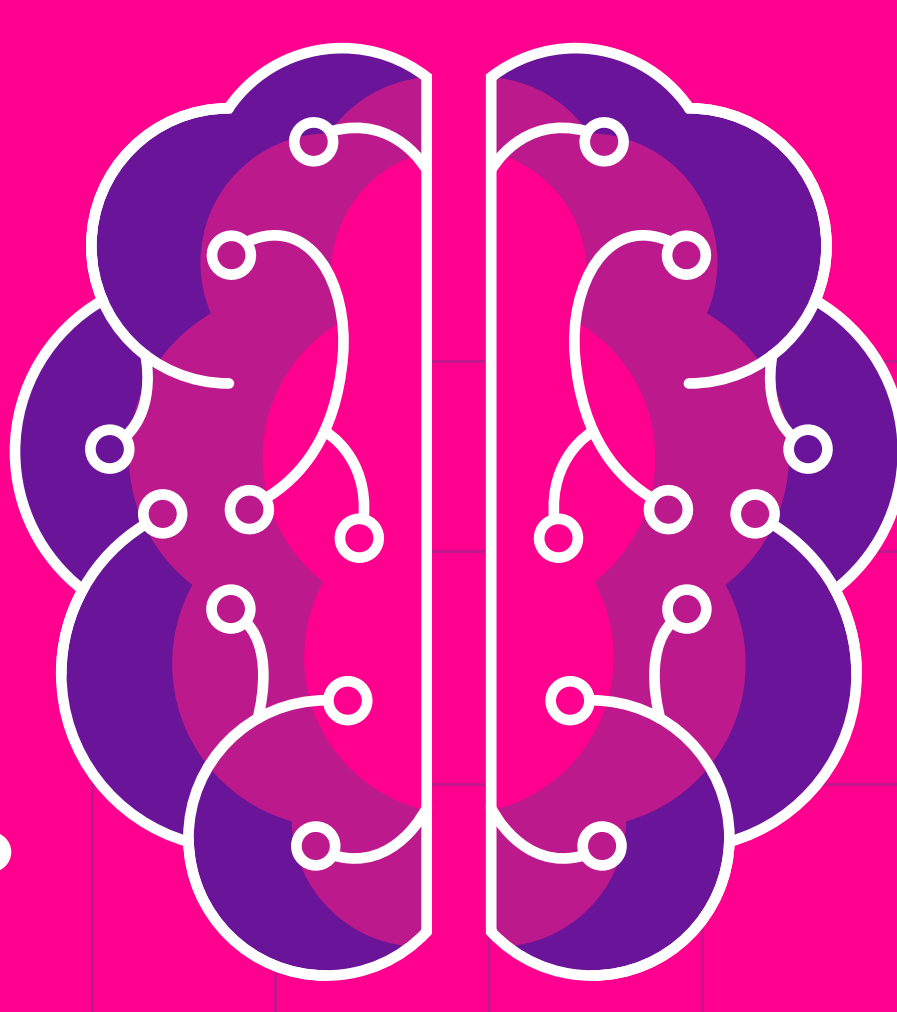

Our innovative use of AI reduces your need to troubleshoot.

RUCKUS Analytics brings the power of artificial intelligence and machine learning to network assurance in two steps:

Step 1

Identify the incident

The system uses machine learning to automatically identify service incidents and then uses artificial intelligence to classify them by order of severity.

Step 2

Recommend a solution

The system then automatically identifies root causes and makes specific remediation recommendations.

An exceptional user experience

Performance

RUCKUS patented and proprietary technologies yield demonstrably better end-user experience than other vendors.

In a Commscope Wi-Fi stress test, RUCKUS was the only vendor able to simultaneously deliver:

- Stall-free streaming HD video to every client
- A good voice mean opinion score (MOS)
- As much as 2x the throughput

Simplicity

Our plug-and-go products offer best-in-class user experience for set-up.

With zero touch provisioning (ZTP), any new RUCKUS device that's connected is automatically provisioned with the proper software and policies, saving time and minimising configuration errors.

The exact same process is used for APs and switches thanks to controller-based management of wired and wireless devices.

Competitively priced, scalable solutions

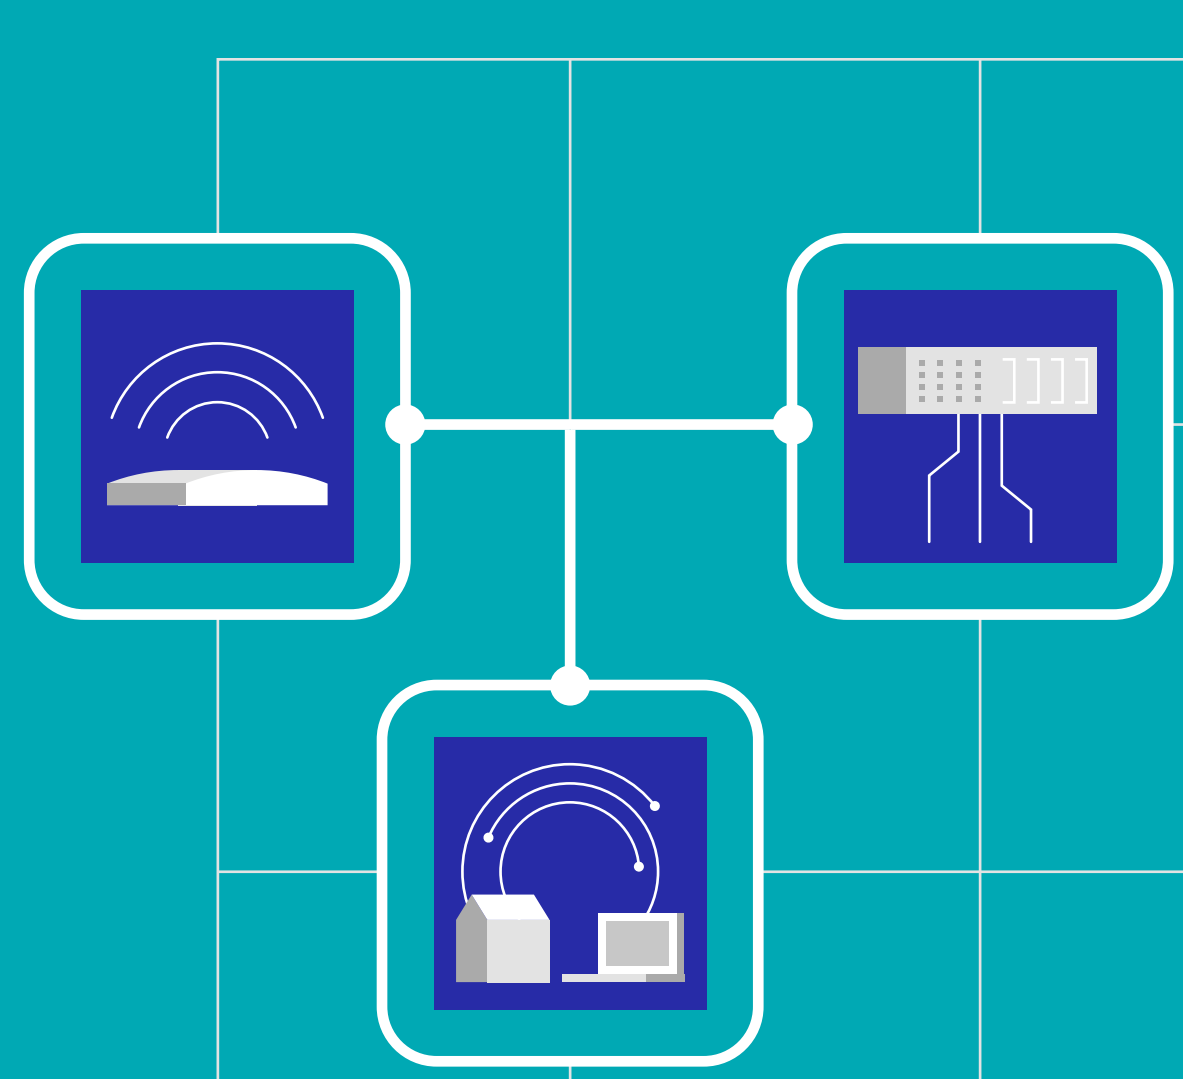

There is a RUCKUS network solution to fit every budget.

- Flexible finance solutions for OPEX and CAPEX
- Discounts and frequent promotions

Adaptable solutions save time and money in the future.

A single RUCKUS network can support LAN, WLAN and IoT end-users, eliminating the need to deploy new networks to support emerging operations/IoT initiatives.

Capacity increase can be addressed without swapping hardware, ensuring investment longevity.

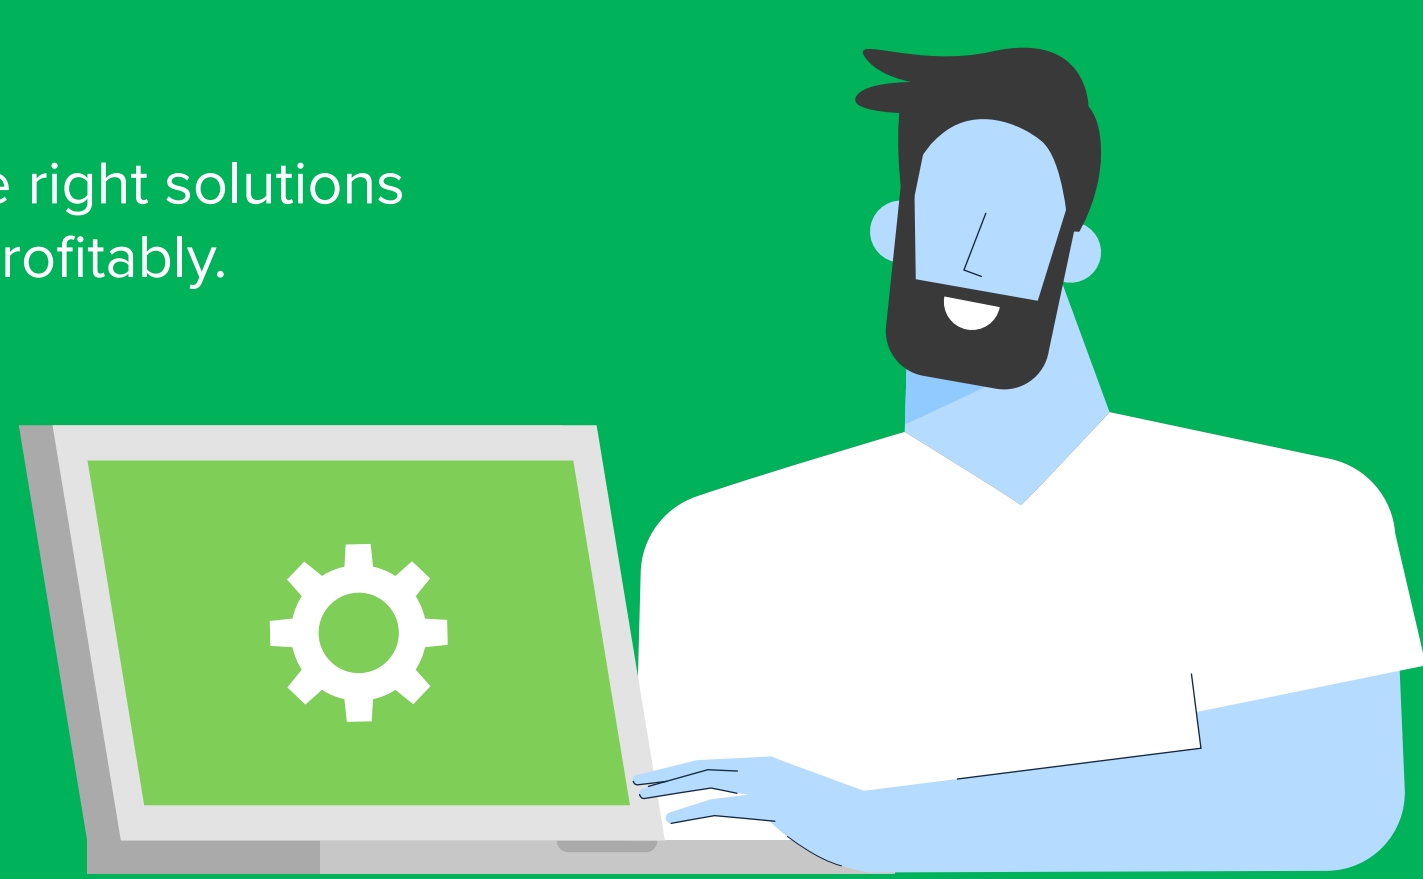

Customer service

One-to-one support.

Our account managers will guide you through finding the right solutions so you are able to meet your customers' requirements, profitably.

Rest assured that all our account managers are:

- Solutions experts supported by an experienced pre-sales technical team.
- Passionate about the channel, the technologies and your success.

Purdicom's Professional Services for RUCKUS help you get the job done right.

- Pre- and post-installation site survey
- Customer product commissioning
- Customer product pre-staging
