

UK'S LEADING CLOUD, NETWORKING, SECURITY
& WIRELESS DISTRIBUTOR

YOUR VALUE-ADDED CLOUD, NETWORKING, SECURITY & WIRELESS DISTRIBUTOR

About Us – What We Do

Purdicom is a multi-award-winning value-added distributor specialising in only the most dominant Wi-Fi, Networking, Security & Cloud technologies.

We are a value-added distributor acting as a supply chain partner to many well-established vendors and brands.

We supply enterprise-level Wireless, Switches, Point-to-Point, Point to Multipoint and Security technologies to a very hungry market. The products and services we sell are always in high demand.

We are a privately owned, channel only business that has become a recognised leader in its industry – and much like the industry itself, our company has been in continual rapid growth since its inception in 2005.

Our promise

Whatever the challenge or budget, we are here to help! Regardless of the size of the opportunity, we have the technical and product knowledge to support both you and your customer. This means you no longer have to turn down new or existing businesses by not having the confidence, expertise or capacity to win them.

We can help you supply your customers with a complete Wired, Wireless and Security solution from the ground up.

We have everything you need

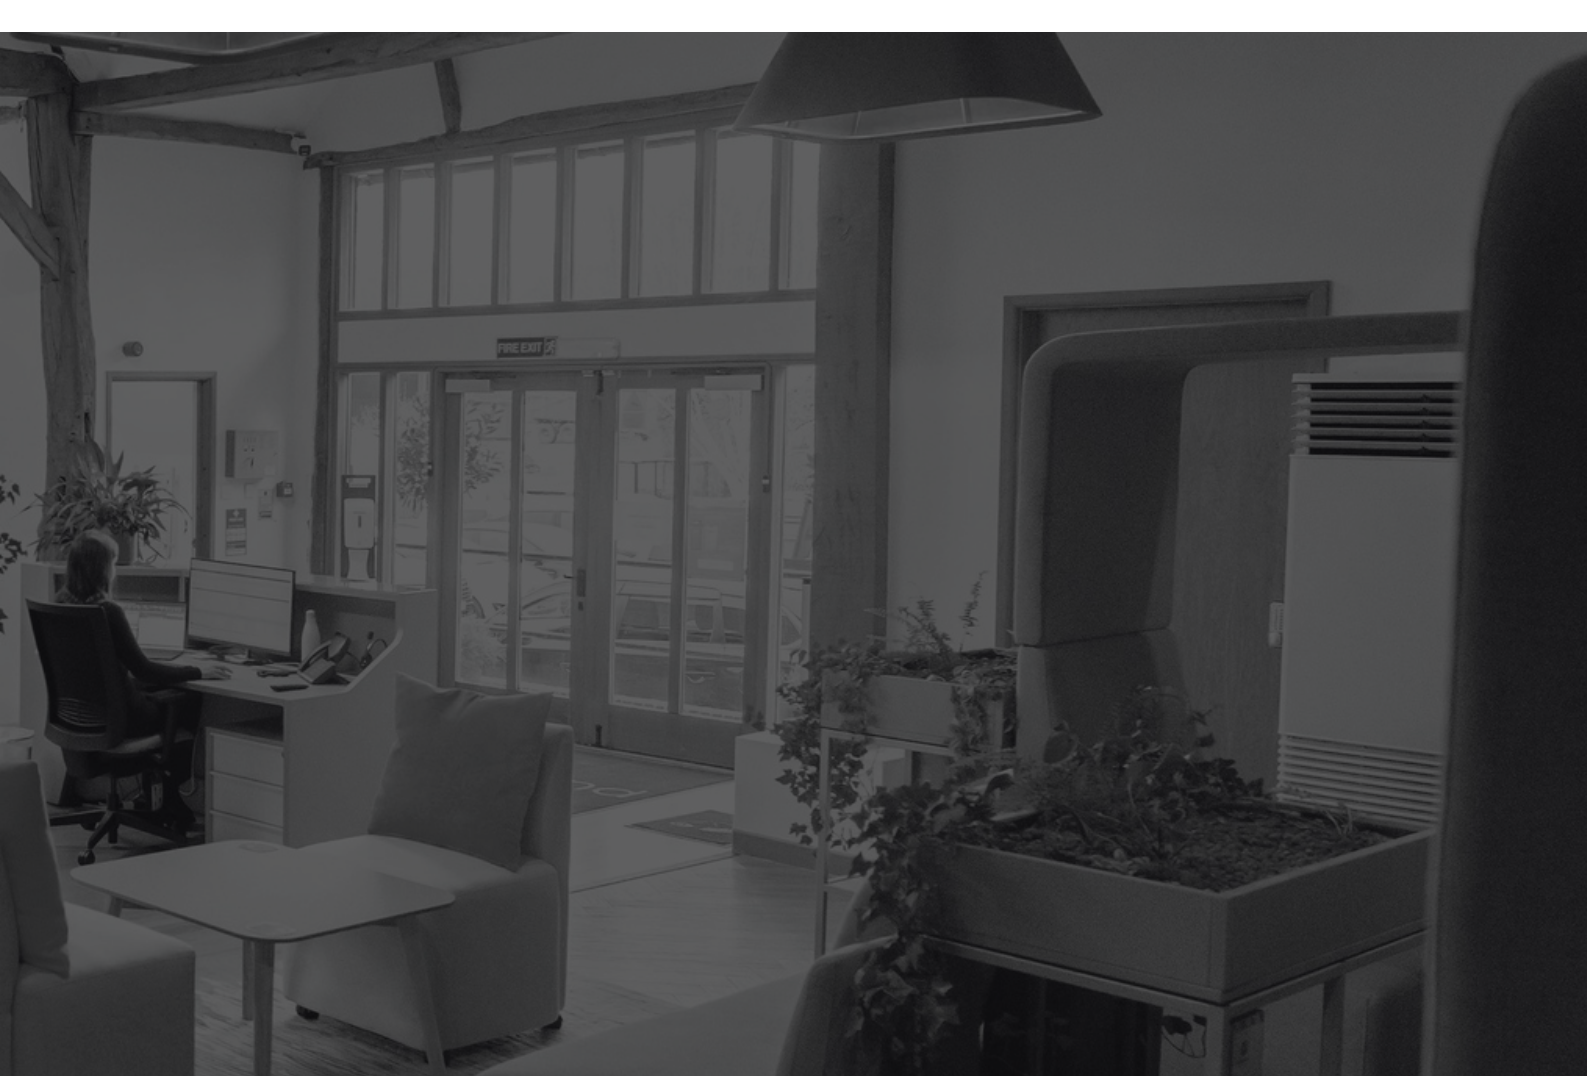

Here at Purdicom, we have whatever you may need to support your customers. From Access Points, Switching, Firewalls and Network Security to Cabling and Power Supply back-ups, we support you throughout the project.

We are better together

We are here to help you grow your business.

Let us get to know you and your business goals, and as part of our team, we can all grow together.

Contact us today on [01488 647 647](tel:01488647647) or email us at sales@purdi.com

SALES

Utilise our high level expert product knowledge to help fulfil your customers requirements.

MARKETING

Event assistance, case study creation, white labelled HTML emails, PDFs, infographics and brochures across each of our vendors.

TECHNICAL

Here to support your technical projects as well as assisting with planning and designing your networks. Have us help set up your solution and deliver to the customer's door.

FINANCE & LOGISTICS

We are proud to offer flexible finance packages, deliveries, asset & RF ID Tagging and storage options.

HELPING YOU WIN MORE BUSINESS.

Indoor Access Points

RUCKUS indoor Wi-Fi access points provide fast speeds and rock solid connectivity in all scenarios including schools, hotels, public areas, hospitals and much more. Ranging from entry-level 2x2:2 802.11ac, to ultra-high-end 8x8:8 Wi-Fi 6 (802.11ax) products, RUCKUS packs the best tech into its APs to ensure you and your end customers don't have a Wi-Fi headache.

Outdoor Access Points

Using the same market-leading technology as the indoor range, RUCKUS outdoor access points provide blanket wireless coverage in public and urban areas, making them ideal for events and festivals, campuses, business parks and more.

ICX Switching

The RUCKUS ICX Family work together to simplify network set-up and management, enhance security, minimise troubleshooting and make upgrades easy. ICX switches work seamlessly with RUCKUS Wi-Fi access points and RUCKUS SmartZone network controllers to deliver the most performance and cost-effective unified wired & wireless access solutions on the market today.

Cloud Services & Management

RUCKUS offers an expansive network management and control portfolio that addresses the feature, capacity and architectural requirements of organisations of all types and sizes. RUCKUS gives you the flexibility to choose from cloud-based, controller-less, on-site and hosted management solutions packed full of features and advanced networking capabilities to give you total control over your wireless network.

Cambium Networks™

Wi-Fi 6 Access Points

Cambium Networks Wi-Fi 6 access points introduce new technologies that deliver higher network speeds whilst also improving the efficiency of a wireless network, especially when there is a large density of connected client devices.

cnPilot Enterprise Wi-Fi

cnPilot 802.11ac Wave 2 Wi-Fi products with advanced management capabilities deliver high capacity and fast installation in an affordable package – to connect people, places and things. Cambium Networks offers secure, scalable, cloud-managed solutions for home, small business, and both indoor and outdoor enterprise local Wi-Fi network applications.

ePMP

Cambium's Point-to-Multipoint (PtMP) and ePMP™ fixed wireless internet solutions connect millions of people across the world. With frequency reuse enabled by GPS Synchronisation and supported by PtMP software, your wireless broadband network can avoid the spectrum crunch and grow with your client base.

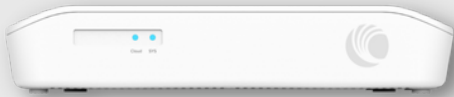

cnMaestro

Available as a cloud-based or on-premises software platform, cnMaestro is your network management system for secure, end-to-end network control. The cnMaestro wireless network manager simplifies device management by offering full network visibility and zero-touch provisioning. Available as cnMaestro X or Essentials.

NSE 3000

Delivering advanced security, routing, and SD-WAN policies for small and medium enterprises. Integrated into Cambiums ONE Network solution enabling organisations to deploy and manage security policy across the network and wired network, all fully managed and controlled as part of a single framework.

cnMatrix Switching

cnMatrix switches simplify network deployment and operation. When deployed with cnPilot WLAN access points and the cnMaestro management system, network operators have an affordable, feature rich, high quality unified wired/wireless enterprise grade network. Cambium Networks' cnMatrix enhances performance, security and end user satisfaction while reducing costs.

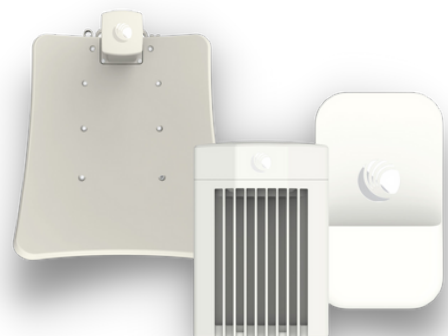

Point to Point and Point to Multipoint

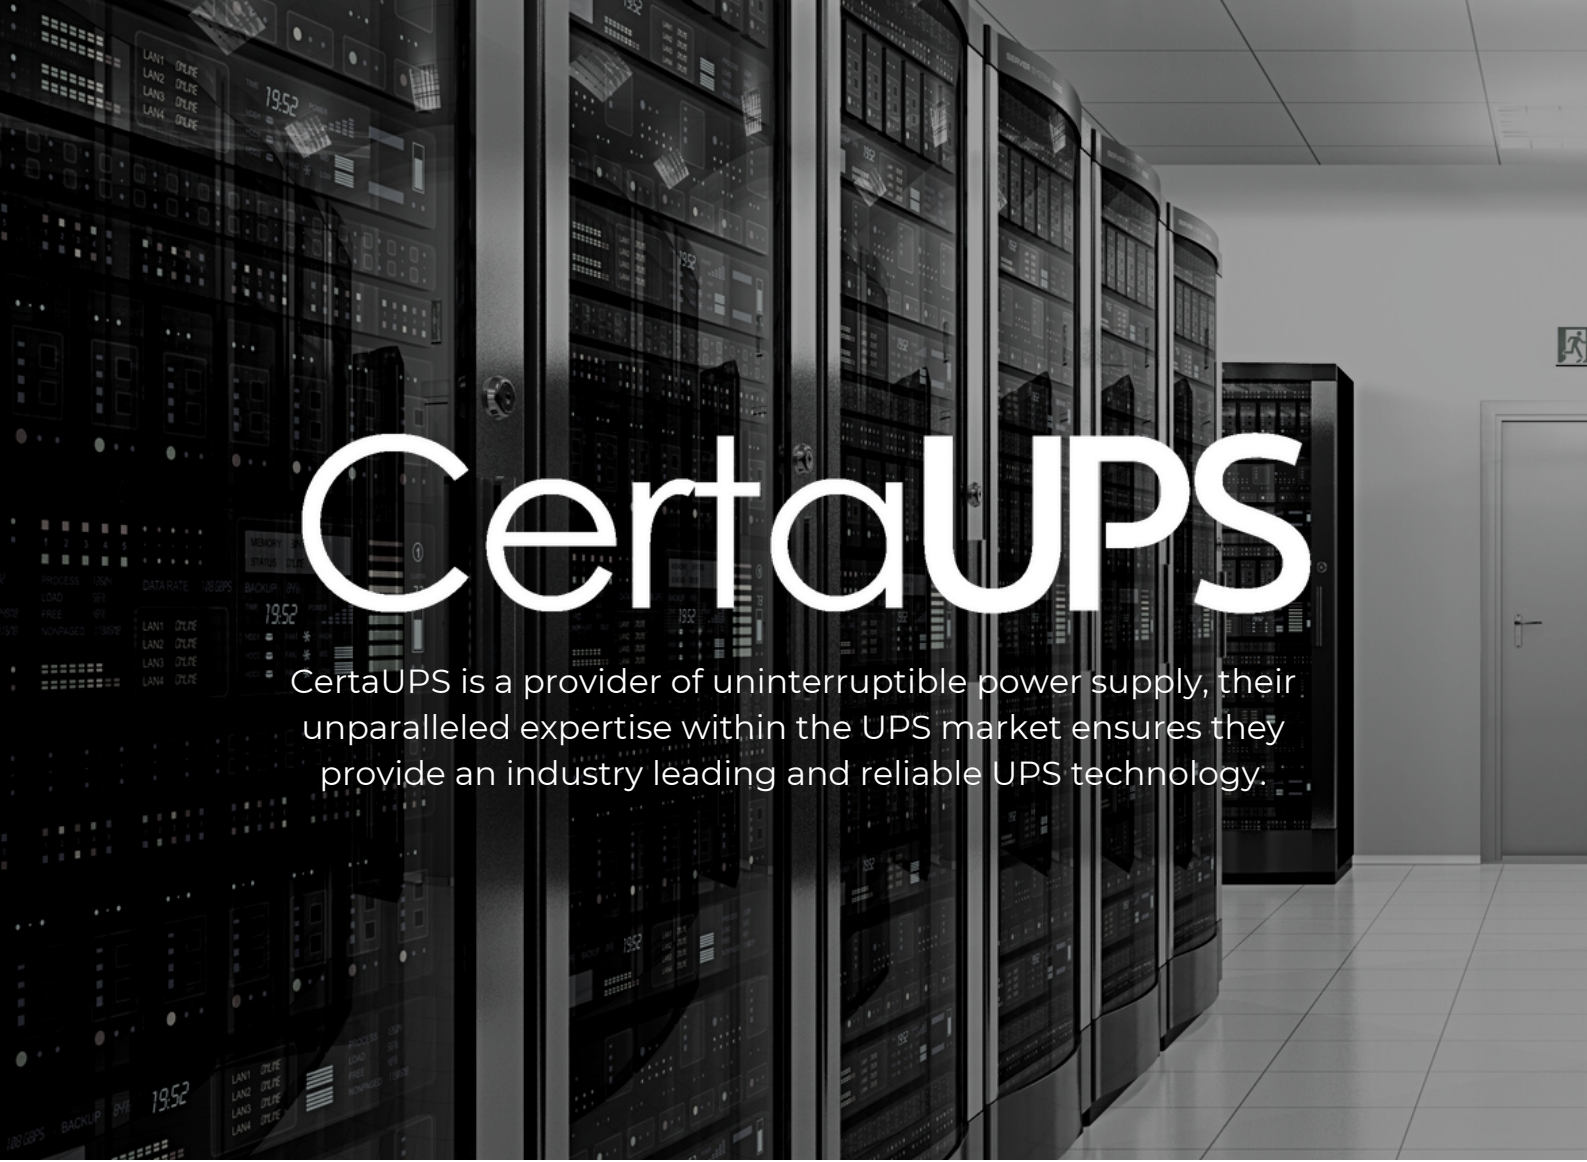

Cambium's PTP solutions are deployed worldwide, serving highly critical applications in formidable environments for the world's most demanding users. With best-in-class real-world performance and FIPS 140-2 approved security available for government and military applications, the PTP series is your connection to what matters, no matter what.

cnWave

Cambium Networks cnWave products are designed for high-speed and high-density deployments. Cambium Networks' 60GHz cnWave solution provides easy, fast, and cost-effective wireless gigabit connectivity and/or high-capacity backhaul for edge access solutions at a significantly lower total cost of ownership than fibre infrastructure.

CertaUPS

CertaUPS is a provider of uninterruptible power supply, their unparalleled expertise within the UPS market ensures they provide an industry leading and reliable UPS technology.

WHY CERTAUPS?

Tried and tested across all five continents, Certa UPS provide backup power solutions that have been designed to the highest quality and performance, ensuring customers can stay online in the event of a power outage. They offer unparalleled knowledge in the emergency power market, steering from 25 years of engineering and emergency power experience.

With a portfolio offering like no other in the UPS market, Certa UPS provide a solution for any business; from Line Interactive to Online Double Conversion through 800VA to 30kVA. The dynamic nature of CertaUPS' range of UPS' encompasses a selection of both tower and rack-mountable systems to suit a range of server rooms.

What is an Uninterruptible Power Supply (UPS)?

An uninterruptible power supply or uninterruptible power source (UPS) is basically a battery. A UPS system should be a major consideration when there is an appliance, especially if it is business-critical. A UPS system will provide emergency power when the power source or mains power fails.

hello@purdi.com 0333 12 12 100

Single Phase UPS Systems

Single Phase UPS Systems cover the need for installation for a local 3-pin, 230 Volt power supply. A Single Phase UPS suits a wide range of applications and is used to deliver industry-leading resilience against a power outage.

With the choice of Line Interactive or Online Double Conversion with power from 800VA to 20kVA, these UPS suit almost all verticals. These single-phase CertaUPS power protection systems deliver reliability, flexibility and affordability.

Three-Phase UPS Systems

Three Phase UPS Systems are designed for three-phase installation using the full 3 phases generated from the grid at 400 Volts. These UPS have been engineered to the highest quality and performance standards to deliver leading-edge efficiency. Three Phase UPS Systems are used for high-power or large installation areas to power machinery and large industrial power applications. Starting at 10kVA through to 30kVA, these UPS come as Online Double Conversion and have a considerably smaller footprint than other comparable three-phase UPS systems on the market.

Micro Data Centre

CertaUPS' standalone rack-level micro data centre is designed in either 24U or 33U height. Fully expandable, the Micro Data Centre provides the capacity to add a data centre into the most restricted of spaces in both non-climate controlled environments and IT rooms.

The plug-and-play ability makes for an easy and cost-effective data centre solution ideal for mission-critical SMBs, branches and edge computing.

Targeting high capacity Smart City applications, fixed 5G, gigabit wireless access solutions and business broadband.

Siklu's selection of industry-leading mmWave solutions offers a complete wireless network.

MultiHaul

Street level point-to-multipoint delivering up to 1.8Gbps over 1000ft range. MultiHaul™ is a PTMP multi-gigabit radio operating over mmW (60GHz). Combining Siklu's market-leading technology with patent-pending scanning antennas that auto-align links.

SmartHaul™ (WiNDE)

Automate network designs with Siklu's SmartHaul™ Wireless Network Design Engine. Input locations and capacities needed in a network and, using cost and complexity factors, automatically determine the most cost-effective and robust Siklu network implementation. The tool also exports a Bill of Materials to build the proposed network.

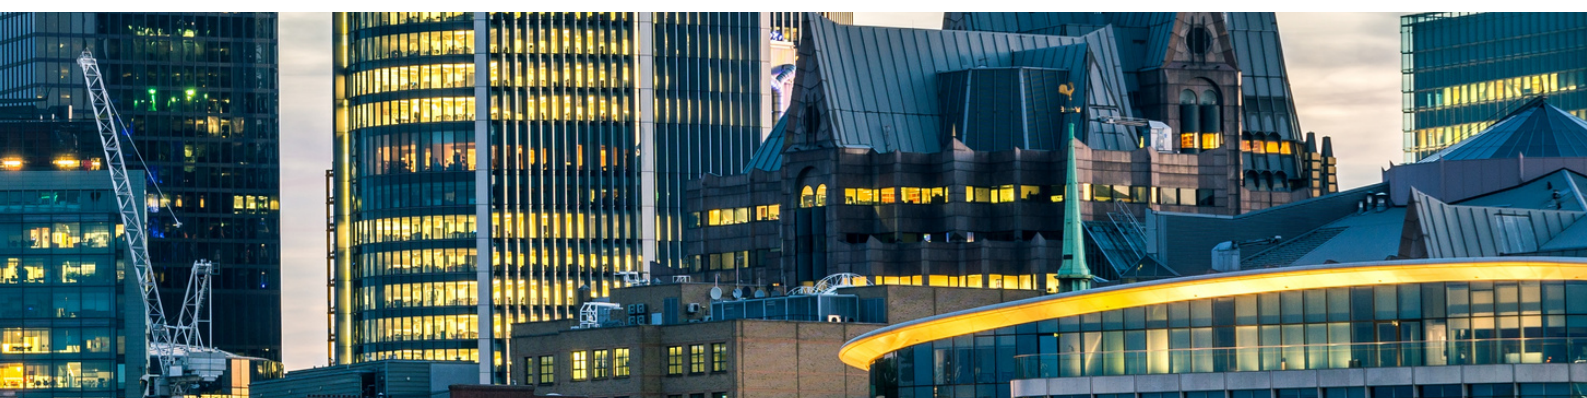

MultiHaul™ TG Terragraph

The MultiHaul™ TG series of products from Siklu advances L2 Software Defined Networking (SDN) mesh technology and innovation and is now its third generation of multipoint 60GHz products and Terragraph-compliant.

With the MultiHaul™ TG series, Siklu has been able to lower the cost of delivering Gigabit wireless connectivity to homes, businesses and Smart Cities. A single unit that provides 360-degree coverage, the N366 provides up to 16Gbps of capacity. The N366 also features built-in self-backhaul, autonomous L2 network self-healing ability and the industry's most advanced, cloud-based SaaS network design and implementation toolkit.

EtherHaul Kilo Series

High-capacity point-to-point delivering up to 10Gbps full duplex over 4.3 miles, perfect for rooftops and radio towers. EtherHaul™ Kilo products are the most widely deployed 70/80GHz radios in the world supporting dense deployments and virtually no interference.

EtherHaul™ Hundred Series

Compact, lightweight, street-level delivering up to 1Gbps PoE-out, perfect for street-level deployments. Operating in the V band (60GHz) frequencies, the Etherhaul™ Hundred series offers virtually interference-free performance at street level.

WHY WATCHGUARD?

Purdicom is a leading UK WatchGuard Distributor. WatchGuard offers an entire network security solution, ensuring businesses are protected and secured against the 'bad guys'.

Value Add for WatchGuard

Pre-Sales Meetings & Recommended Bill of Materials

Either our Technical or Sales Teams can arrange a pre-sales meeting with you to discuss your requirements and the business you're trying to win.

Technical Demonstrations

We offer free, pre-sales visits to carry out technical demonstrations of all the kits we sell.

Technical Support & Commissioning

Our Technical Team are always available to assist with any technical queries you may have. They can offer support and advice with the kit, as well as coming to help with installation and setup.

WatchGuard Network Security

WatchGuard provides the most comprehensive security services, with their Total Security Suite covering traditional intrusion prevention, gateway antivirus, application control, spam prevention, and URL filtering, and encompassing advanced services for protecting against evolving malware, ransomware, and data breaches.

WatchGuard EndPoint Security

DNSWatchGo provides DNS-level protection and content filtering on the go, keeping your business safe from phishing, ransomware, and other attacks even when your user is outside of the network.

It monitors outbound DNS requests, correlating them against an aggregated list of malicious sites. Requests that are determined to be malicious are blocked, redirecting the user to a safe site, stopping risky clicks from becoming major security incidents.

WatchGuard Multi-Factor Authentication

WatchGuard's unique MFA solution reduces network disruptions and data breaches arising from weak or stolen credentials. WatchGuard's AuthPoint offering goes beyond traditional 2-factor authentication by incorporating innovative ways to identify users.

WatchGuard Panda AD360

The endpoint is a favourite target for cybercriminals, with plenty of known vulnerabilities to be exploited, and software versions that are often out of date. It's past the time when businesses of all sizes need to implement powerful endpoint security that includes Endpoint Protection (EPP) integrated with advanced endpoint detection and response (EDR) technologies.

WatchGuard Secure Wi-Fi

WatchGuard offers indoor and outdoor access points to ensure you can support your environment with the speed, connections and client density that it needs. WatchGuard ensures each access point will extend your trusted wireless environment throughout your deployment. These access points provide the security solution to also defend your business against the known Wi-Fi Threat categories.

The Future of Connectivity, Now at Your Fingertips

IO Managed Ethernet Switches

Managed Switching Solutions for Scalable, Flexible Network Design

IO provide a comprehensive portfolio of budget-friendly switching solutions optimised to deliver secure, reliable networks and seamless edge connectivity for both commercial and industrial projects.

Commercial Access Switches

The IO switching line-up includes six main products, each with several variants. First in line are three layer 2 access switches targeting commercial applications featuring 4, 8, or 24 ports respectively – each available in multiple variants indicated by the last section of the model number.

Industrial Access Switch

Next they have a robust 8 port POE+ Layer 2 managed industrial access switch with 2x1G SFP, 2x1G RJ45 Uplinks and Dual DC Power Supplies. The industrial switching unit comes housed in a rugged enclosure with DIN Rail Mount as well as rack mount options.

Aggregation Switches

To complete the IO switching line-up we have two variations of a 24 port aggregation switch, the first being L2, and the second featuring both L2 and L3 Lite allowing for flexible network design and excellent saleability when working with multiple 10G backhaul. Both aggregation switch units are available in multiple variants too.

IO Access Points

Feature Packed & Budget Friendly

Indoor Access Points

IO's indigenously engineered Access Points are compact, built to last and come in a wide range of indoor and outdoor models to suit all requirements, from basic home users to the most demanding smart city environments and extreme weather conditions.

Outdoor Access Points

Value-packed with all the latest tech at palatable yet margin-rich price points, the IO range by HFCL presents you with an opportunity to please both your customers and your pockets.

IO Weave

Experience uninterrupted connectivity in every corner of your home.

Unstoppable best-in-class connectivity with IO Weave powered by Wi-Fi 6. Eliminating Wi-Fi dead zones, dropouts, and buffering issues, this solution builds stronger connections for the ultimate in uninterrupted connectivity.

Home Mesh Router

Targeting smart home users with high-end broadband connections 'IO Weave' HMR is a dual-band 2x2 Wi-Fi 6 mesh router system & mobile app capable of delivering a peak data rate of 3 Gbps for up to 256 clients at once. IO Weave is destined to make a huge splash in the home market

IO Power Solutions AC/DC PoE Injectors

Power Solutions for a Resilient Network

Indoor & Outdoor PoE Injectors

IO by HFCL offers two high-power Gigabit POE+ Injector units, one for indoor use and the other designed to withstand harsh outdoor environments. Both units feature essentially the same internal spec, with the exceptions being the physical characteristics and environmental limits within which they can operate.

Providing network and wireless solutions

INNOVATION AND EXCELLENCE

Designed to offer the greatest level of functional control and flexibility without compromising on value.

WHY MIKROTIK?

MikroTik has emerged as a global leader in providing versatile and robust networking solutions. The primary focus revolves around developing powerful and cost-effective networking hardware and software, catering to a diverse range of users, from individual enthusiasts to large-scale enterprises and internet service providers (ISPs).

What sets MikroTik apart is its commitment to democratising high-quality networking technology. Whether you're seeking to enhance the connectivity of your home or business, build a wireless ISP network in a rural area, or establish a complex routing infrastructure, MikroTik offers a comprehensive suite of products and services to meet your needs.

Choosing to purchase your MikroTik products from Purdicom Ltd is a sound decision. Purdicom is a trusted and reputable distributor in the networking industry, ensuring that you receive genuine MikroTik products backed by reliable warranties and customer support. With extensive expertise in networking solutions, Purdicom can provide tailored advice and assistance, helping you select the right MikroTik products to meet your specific needs.

hello@purdi.com 0333 12 12 100

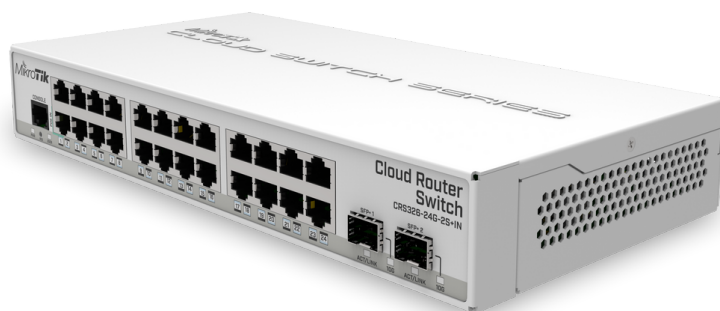

MikroTik Routers

Renowned for reliability and versatility, MikroTik's routers go beyond networking. With their RouterOS operating system, they're not just data traffic managers but also security firewalls, advanced routers, and wireless access points. From home networks to enterprises, MikroTik offers granular control, top performance, and cost-effectiveness in a compact package.

MikroTik Switches

MikroTik leads in modern network solutions, providing high-performance switches for diverse needs. Their switches efficiently manage traffic with VLAN, PoE, and RouterOS controls, fitting small offices to data centres. Known for robustness and affordability, MikroTik offers reliable, cost-effective networking solutions.

MikroTik's 60GHz PtP & PtMP Antennas and Radios

Utilising millimetre-wave wireless tech, MikroTik offers high-speed, low-latency connectivity for diverse uses.

Designed for short-range links, like building connections and broadband delivery, these products exceed gigabit speeds. MikroTik's 60GHz solutions bridge gaps effectively, praised for ease, affordability, and reliable, high-bandwidth connections in urban and tough settings.

A managed service provider enabling user engagement, reporting and control for your public Wi-Fi networks.

Hi there!
How can we help you today?

Please can you tell me more about who you are and what you do?

Sure! Encapto WiFi is a one-stop configuration, management, reporting and control system for your WiFi network. Encapto Cloud Deck's intuitive web interface enables secure access from anywhere, so managing even the most complex WiFi network becomes a breeze. Encapto offers the flexibility of local onsite or cloud hosted services. Either way, your WiFi system is always secure, available and scalable.

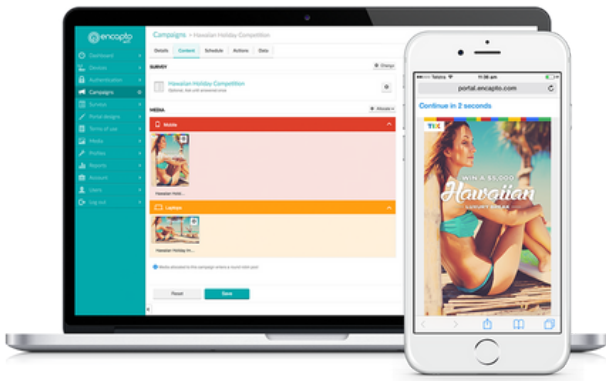

Encapto Products

Encapto Platform

One-stop user engagement, configuration, reporting and control for your Wi-Fi network. Encapto lets you manage Wi-Fi user engagement, management and orchestration of your network and advanced access controls, providing rich analytics and giving you full visibility of your network.

Encapto Campaign

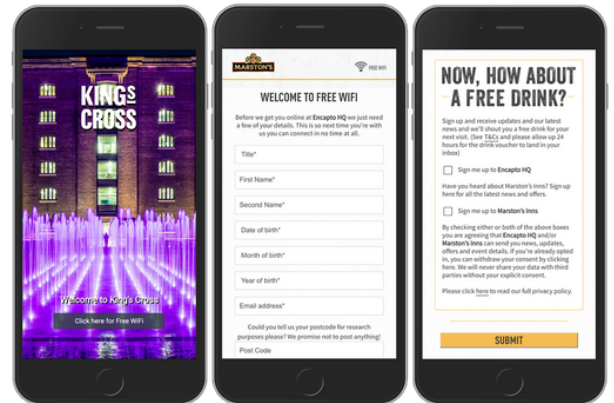

Encapto Campaign is the Wi-Fi advertising module that comes as part of the platform and allows for a network that engages users like nothing else. Deploy targeted and scheduled dynamic content to Wi-Fi users to send the most effective message to the right visitors at the right time.

WYSIWYG Portal Editor

Quick and easy creation of branded web authentication portals. Once created, portals can be applied to one or multiple hotspots.

Create any page layout by arranging multiple columns, rows, and types of content anywhere on the page – build a custom web page.

- Ability to have multiple portals assigned to groups (sites) of access points
- Specify the location of the get online section, get online button (if used) and surveys
- Apply custom HTML or CSS to go the extra mile and tweak the page to your desire
- Regardless of how you arrange your content, resulting portals remain fully mobile-responsive

The future is managed. Are you ready?
