

Transform How Your School Shares and Controls Documents.

Document GPS gives you real-time control over your files before and after sending. It's secure, auditable, and perfect for protecting sensitive student, staff, and financial data.

Use Case for Education

Sending IEPs & Student Records

Prevents FERPA violations via secure, revocable access

Board Meeting Docs & Legal Docs

Enables traceable, secure sharing with full audit logs

Faculty Contracts & HR Docs

Maintains confidentiality and prevents data leaks

Admissions & Financial Aid Docs

Secures PII and documents across departments or campuses

Cybersecurity & Ransomware Prep

Ensures business continuity during email or system compromise

Document GPS Features

Tokenized, Encrypted Attachments

Protects students & staff data during and after delivery

Remote Access Revocation

Instantly revoke access if shared with the wrong person

Immutable Audit Trails

Ensures compliance with FERPA, HIPAA, GDPR & aids in investigations

Admin Dashboard & Reporting

Gives IT complete oversight of document activity and usage

Link & Email Integration

No new systems needed. It works within existing email workflows

Zero Trust Architecture

Adds critical layer of protection against internal & external threats
